Summary

Senior QA Automation Engineer with 6+ years of experience in **Manual, Automation, API, Performance, and End-to-End Testing** across enterprise and large-scale systems. Currently working on the NEOM project as **Acting Squad Lead**, leading QA strategy, building scalable automation frameworks, improving test coverage, and enhancing release quality within **Agile and CI/CD environments**.

Education

Ahram Canadian University (ACU) <i>Bachelor of Computer Science & IT (Software Engineering)</i> Grade: Very Good — GPA: 3.03 Graduation Project (Excellent): College Learning Management System Developed using Node.js, Vue.js, MongoDB, with full testing (Manual, API, Automation).	Giza, Egypt 2018 – 2022
--	----------------------------

Certifications

ISTQB® 7x Certified Tester — Foundation & Advanced Levels CTFL, CTFL-AT, CT-MAT, CTAL-TAE, CTAL-ATT, CTAL-TA, CTAL-TTA	
---	--

Experience

Senior Software QC Automation Engineer <i>Pulse by Solutions – Solutions by STC – NEOM Project</i> <i>(Formerly Giza Systems)</i>	Sep 2025 – Present <i>Full-Time – Hybrid – Cairo, Egypt</i>
Acting as Squad Lead, leading QA strategy and ensuring product quality for NEOM digital platforms across multiple services. - Built and maintained automation using Selenium (Java), improving regression efficiency by 40% and reducing manual testing effort. - Performed API testing using Postman with backend validation, ensuring data integrity across microservices. - Managed test cycles using Jira and Zephyr Scale, increasing test coverage visibility and traceability across sprints. - Executed cross-browser testing using BrowserStack, ensuring consistent user experience across multiple platforms and devices. - Collaborated with cross-functional Agile teams, improving release quality and reducing production defects by 30%.	
QC Team Lead – Senior QA Engineer <i>iGenTech</i>	Jul 2024 – Sep 2025 <i>Full-Time – Hybrid — Giza, Egypt</i>
Established QA and automation processes from scratch across multiple projects in a software house environment, covering fintech, web applications, dashboards, and enterprise platforms. Led QA and automation efforts, defining testing strategies, workflows, and best practices across different products. - Built scalable automation frameworks using Selenium, Appium, and Shaft Engine to support diverse project needs. - Performed API and performance testing using Postman and JMeter, ensuring system reliability and scalability. - Improved test coverage and reduced production defects by 25% through structured QA processes. Mentored and guided QA engineers, enhancing team productivity and delivery quality. - Collaborated with cross-functional teams to integrate QA within CI/CD pipelines and Agile workflows.	

Teaching Assistant

Ahram Canadian University (ACU)

Aug 2024 – Present
Part-Time – Onsite — Giza, Egypt

- Delivered sessions in **Software Testing, QA, and Software Engineering**.
- Mentored students on real-world QA practices, testing methodologies, and automation tools.
- Guided students in applying software testing concepts through practical academic projects.

Senior Software Test Engineer

e-finance

May 2024 – Sep 2024
Full-Time – Hybrid — Giza, Egypt

- Worked on enterprise logistics platforms and built automation using **Selenium and Playwright**.
- Performed **API testing and load testing** using Postman and JMeter.
- Ensured system stability and scalability across high-load environments.

Software Test Engineer

Seoudi Supermarket

Sep 2023 – May 2024
Full-Time – Hybrid — Giza, Egypt

- **Established QA processes for a full retail ecosystem** including customer-facing and internal systems.
- Validated **end-to-end workflows** across web, mobile, admin, kitchen, and call center platforms.
- Built automation and executed performance testing using **Selenium, Playwright, and JMeter**.
- Identified UX issues and provided detailed feedback to improve end-user experience.

Software Test Engineer

Lookfindr

Dec 2023 – Mar 2024
Part-Time – Remote — Riyadh, Saudi Arabia

- **Introduced structured testing practices** and improved QA coverage for multi-platform booking and e-commerce applications.
- Tested mobile and web applications, ensuring cross-device compatibility, functional accuracy, and usability.

Freelancer Software Test Engineer

Various Platforms (Utest, Upwork, TesterWork)

Jan 2023 – Present

Freelance – Remote

- Worked on **30+ global QA projects** (Meta, Slack, etc.) across functional, exploratory, and automation testing.
- Delivered detailed defect reports with clear reproduction steps, improving issue resolution efficiency across distributed teams.

Software Test Engineer

NBE - National Bank of Egypt

Oct 2022 – Sep 2023
Full-Time – On-Site — Cairo, Egypt

- Worked on banking systems focusing on **automation, API testing, and data validation**.
- Ensured compliance with high-security and financial system requirements.

Software Tester

Dr Coding

Aug 2021 – Oct 2022
Part-Time – Hybrid — Cairo, Egypt

- Performed manual testing and API validation for web applications.
- Reported and tracked defects using **Jira** with clear steps and detailed evidence.

Skills

Testing Types: Manual, Functional, Regression, Exploratory, API, Mobile, Performance, Accessibility Testing.

Automation Tools: Selenium WebDriver (Java), Playwright (TypeScript), Shift Engine, Appium, TestNG, Cucumber, Maven, Gradle.

Frameworks: Hybrid Frameworks, Page Object Model (POM), Data-Driven Testing, BDD, Automation Framework Design.

Tools: Jira, Zephyr Scale, ClickUp, Postman, JMeter, REST Assured, BrowserStack, Jenkins, Git, GitHub, GitLab.

Databases & Programming: MySQL, MongoDB, SQL Server, Java, JavaScript, PHP, C++, HTML, CSS, OOP, SOLID Basics.

DevOps & Others: CI/CD Fundamentals, CLI, RESTful APIs, JSON, XML, Browser DevTools.

Languages & Soft Skills: Arabic (Native), English (Very Good — Professional Working Proficiency)

Leadership, Team Mentorship, Problem Solving, Analytical Thinking, Attention to Detail, Communication Skills, Stakeholder Collaboration, Time Management, Adaptability, Working Under Pressure.
