

Mohamed Yehia

Software Testing & Quality Control Lead

Giza, Egypt | Exempted from Military Service

+201127624482 | mohamedy.selim14@gmail.com | linkedin.com/in/mohamed-yehia-selim

Summary

QC Team Lead at **iGenTech** with 6+ years of experience in software quality engineering across **enterprise, fintech, AI, retail, and large-scale digital transformation projects**. Experienced in leading QA teams, establishing QA processes and automation frameworks, and driving quality across the SDLC/STLC within **Agile and CI/CD environments**. Strong background in **Manual, Automation, API, Mobile, Database, Performance, and End-to-End Testing**, backed by **9 ISTQB®** certifications.

Education

Ahram Canadian University (ACU)

Bachelor of Computer Science & IT (Software Engineering)

Giza, Egypt

2018 – 2022

- **Grade: Very Good** — **GPA: 3.03**
- **Graduation Project (Excellent):** College Learning Management System
Developed using Node.js, Vue.js, MongoDB, with full testing (**Manual, API, Automation**).

Certifications

- **ISTQB® 9x Certified Tester** — Foundation, Specialist & Advanced Levels
CTFL, CTFL-AT, CT-MAT, CTAL-TAE, CTAL-ATT, CTAL-TA, CTAL-TTA, CT-AI, CT-GENAI

Experience

QC Team Lead

iGenTech

Sep 2024 – Present

Full-Time – Hybrid — Giza, Egypt

- Established the **QA function and automation strategy from scratch** across multiple client projects in fintech, AI, enterprise, and web platforms.
- Led QA activities by defining **test strategies, QA processes, test planning, estimations, and release readiness** while collaborating with cross-functional Agile teams.
- Designed and maintained scalable automation frameworks using **Selenium, Playwright, Appium, and SHAFTEngine** for web and mobile applications.
- Performed **API, integration, database, and performance testing** using Postman, REST Assured, SQL, and JMeter to ensure system reliability and business continuity.
- Tested AI-powered solutions including **eKYC, chatbot workflows, recommendation systems, and intelligent validation features**.
- Reduced production defects by **25%** through risk-based testing, improved test coverage, and structured QA processes.
- Mentored QA engineers and drove continuous quality improvements by integrating automated testing into **CI/CD pipelines**.

Senior Software QC Automation Engineer

*Pulse by Solutions – Solutions by STC – NEOM Project
(Formerly Giza Systems)*

Sep 2025 – Oct 2026

Full-Time – Hybrid – Cairo, Egypt

- **Acting as Squad Lead**, leading QA strategy and ensuring product quality for NEOM digital platforms across multiple services.
- Built and maintained automation using **Selenium (Java)**, improving regression efficiency by **40%** and reducing manual testing effort.
- Performed **API testing** using Postman with backend validation, ensuring data integrity across microservices.
- Managed test cycles using **Jira** and **Zephyr Scale**, increasing test coverage visibility and traceability across sprints.
- Executed cross-browser testing using **BrowserStack**, ensuring consistent user experience across multiple platforms and devices.
- Collaborated with cross-functional Agile teams, improving release quality and reducing production defects by **30%**.

Teaching Assistant

Ahram Canadian University (ACU)

Aug 2024 – Present
Part-Time – Onsite — Giza, Egypt

- Delivered sessions in **Software Testing, QA, and Software Engineering**.
- Mentored students on real-world QA practices, testing methodologies, and automation tools.
- Guided students in applying software testing concepts through practical academic projects.

Senior Software Test Engineer

e-finance

May 2024 – Sep 2024
Full-Time – Hybrid — Giza, Egypt

- Worked on enterprise logistics platforms and built automation using **Selenium and Playwright**.
- Performed **API testing and load testing** using Postman and JMeter.
- Ensured system stability and scalability across high-load environments.

Software Test Engineer

Seoudi Supermarket

Sep 2023 – May 2024
Full-Time – Hybrid — Giza, Egypt

- **Established QA processes for a full retail ecosystem** including customer-facing and internal systems.
- Validated **end-to-end workflows** across web, mobile, admin, kitchen, and call center platforms.
- Built automation and executed performance testing using **Selenium, Playwright, and JMeter**.
- Identified UX issues and provided detailed feedback to improve end-user experience.

Software Test Engineer

Lookfindr

Dec 2023 – Mar 2024
Part-Time – Remote — Riyadh, Saudi Arabia

- **Introduced structured testing practices** and improved QA coverage for multi-platform booking and e-commerce applications.
- Tested mobile and web applications, ensuring cross-device compatibility, functional accuracy, and usability.

Freelancer Software Test Engineer

Various Platforms (Utest, Upwork, TesterWork)

Jan 2023 – Present

Freelance – Remote

- Worked on **30+ global QA projects** (Meta, Slack, etc.) across functional, exploratory, and automation testing.
- Delivered detailed defect reports with clear reproduction steps, improving issue resolution efficiency across distributed teams.

Software Test Engineer

NBE - National Bank of Egypt

Oct 2022 – Sep 2023
Full-Time – On-Site — Cairo, Egypt

- Worked on banking systems focusing on **automation, API testing, and data validation**.
- Ensured compliance with high-security and financial system requirements.

Software Tester

Dr Coding

Aug 2021 – Oct 2022
Part-Time – Hybrid — Cairo, Egypt

- Performed manual testing and API validation for web applications.
- Reported and tracked defects using **Jira** with clear steps and detailed evidence.

Skills

Testing Types: Manual, Functional, Regression, Exploratory, API, Mobile, Performance, Accessibility Testing.

Automation Tools: Selenium WebDriver (Java), Playwright (TypeScript), Shift Engine, Appium, TestNG, Cucumber, Maven, Gradle.

Frameworks: Hybrid Frameworks, Page Object Model (POM), Data-Driven Testing, BDD, Automation Framework Design.

Tools: Jira, Zephyr Scale, ClickUp, Postman, JMeter, REST Assured, BrowserStack, Jenkins, Git, GitHub, GitLab.

Databases & Programming: MySQL, MongoDB, SQL Server, Java, JavaScript, PHP, C++, HTML, CSS, OOP, SOLID Basics.

DevOps & Others: CI/CD Fundamentals, CLI, RESTful APIs, JSON, XML, Browser DevTools.

Languages & Soft Skills: Arabic (Native), English (Very Good — Professional Working Proficiency)

Leadership, Team Mentorship, Problem Solving, Analytical Thinking, Attention to Detail, Communication Skills, Stakeholder Collaboration, Time Management, Adaptability, Working Under Pressure.
